

# HOW TO SELECT THE RIGHT BIKE...

## Children's

A child's first bike – these 12", 16" and 20" wheel bikes are great for beginner riders.

## BMX

Smaller, single-speed bikes made for people of all ages who enjoy riding, jumping or racing on dirt or smooth surfaces. Freestyle bikes feature a brake cable detangler for wheel spins and other tricks.

20" wheel bikes.

## ALL-TERRAIN

The hardtail mountain bike is ideal for general trail and path riding thanks to its lightweight, simple construction. The full suspension mountain bike is perfect for more aggressive, off-road riding adventures.

24" and 26" wheel bikes.

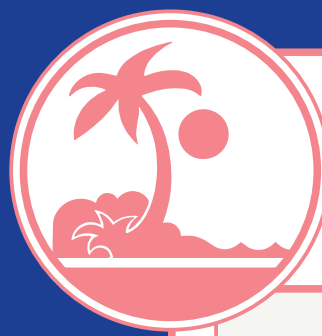

## COMFORT

All-terrain bikes with ergonomically-superior upright riding positions, suspension forks, soft grips, cushy saddles and wide-range gearing.

26" wheel bikes.

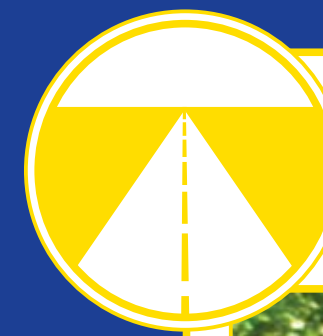

## Cruiser

Classic styling, fat tires and general simplicity set these bikes apart from others. Cruisers offer wide saddles, upright riding positions and wide swept-back handlebars.

26" wheel bikes.

## ROAD

Designed for use on hard surfaces, drop-bar road bikes have skinny tires, lightweight frames and wide gearing ranges. Flat-bar road bikes have a more comfortable, yet less-efficient upright riding position.

700c wheel bikes.

## HYBRID

Great for paved trails and street riding, this lightweight bike with narrow tires, multiple speeds and a shock-absorbing seat provides an efficient, speedy ride that's perfect for the fitness conscious rider.

700c wheel bikes.
